For your Joomla! website you need a hosting service provider who understands, believes in and works with Joomla!
That's us!

We offer a range of hosting packages to choose from, our package options will help you find the best service to suite the requirements for your businesses or personal website.

In addition, we also offer expert, informative and helpful hosting and Joomla! Support as part of the package. Support is a non-negotiable. You don't want to be left in the dark with questions or problems you don't know how to fix or will have to pay a fortune to have fixed by someone one else. We are experts in Joomla!, and are committed to providing a great service.

An excellent security service to put your mind at ease, is our daily server backup. This will ensure that if in the event of a site hack or another major problem, you will be assured that you will never lose more than a day's information.

We offer the following services:

- Domain Registration
- Email Hosting
- Website Hosting
- Website Support
- Website Management
- Training and Advice
- Advocacy for Joomla, Moodle and other open source software

Domain Registration:

Remember that a

website domain needs to be renewed every year, as your hosting service provider, we cover this hosting cost free of charge to you!

If you are a beginner to Joomla!, visit our <http://www.joomla.org.za> and check out our Joomla! Training courses and Joomla! tutorials.

We also offer SEO (Search Engine Optimization) courses to help you get your site positioned in the search engines and to get as much profile as possible.
